STREET FURNITURE

Metal street furniture: benches, planters, waste bins, lampposts

Street furniture is sometimes rather dismissively referred to as "dressing" for the street scene.

But street furniture has more than a merely decorative role: it must also be highly functional. Traffic islands must provide safety, benches must provide comfort, waste bins must keep the street clean.

High quality street furniture

City and local authorities are therefore looking for high quality street furniture which can stand up to severe weather conditions and frequent use. BeNed are specialists in the design and supply of metal street furniture including underground electrical outlets and water supplies, lampposts, benches, plant containers and tree grilles of the highest quality. Manufacturing all our street furniture in our own factory allows us to maintain tight control of quality and avoid unnecessary costs.

No payments to middlemen, no transport costs bring items in from abroad.

All the street furniture we supply is produced 100% in Belgium.

Creative design and smart technology

Our street furniture can be supplied in a wide range of materials and finishes including stainless, plain and weathering steel, painted or galvanised or finished with a variety of recycled plastics. but the creativity doesn't stop there. Our aim is to enhance the street scene with high quality, functional street furniture.

In order to achieve this we welcome the opportunity to assist city and local authorities with their design work and to provide professional advice as they work through their ideas.
